PROFESSIONAL SUMMARY

- Computer Science graduate student with experience in full-stack development, machine learning, cloud technologies, and data visualization. Skilled in developing scalable web applications, RESTful APIs, authentication systems, and interactive dashboards using React, Node.js, Python, MongoDB, SQL, and Firebase.

TECHNICAL SKILLS

- Programming Languages: Python, Java, JavaScript, C, C++
- Web Development: HTML5, CSS3, React.js, Node.js, Express.js, REST APIs, Bootstrap
- Databases: MySQL, PostgreSQL, MongoDB, Firebase
- Cloud & Tools: AWS, Google Cloud Platform, Git, GitHub, VS Code
- Data & Analytics: Tableau, OpenCV, MediaPipe, Machine Learning
- Methodologies: Agile, MVC Architecture

PROJECTS

- MERN Stack Task Manager – Built a full-stack task management application using React.js, Node.js, Express.js, and MongoDB with JWT authentication and CRUD functionality.
- AI Chat Application using OpenAI API – Developed an AI-powered chat application with OpenAI API integration and real-time interaction features.
- Hand Gesture Recognition using Python and ML – Created a real-time hand gesture recognition system using OpenCV and MediaPipe.
- Schedule and Reminder Management System – Designed a cloud-based scheduling platform using Firebase, Bootstrap, and JavaScript.
- Tableau Dashboard – Superstore Analytics – Built interactive dashboards for business insights and sales trend analysis.
- Time Counter Application – Developed a responsive full-stack time tracking application using Java and REST APIs.

EDUCATION

- University of Central Oklahoma – Master of Science in Computer Science | 2025

- CMR College of Engineering and Technology – Bachelor of Technology in Information Technology | 2023

CERTIFICATIONS

- Full Stack Web Development and Mobile App Development – Udemy
- React JS – Scalar
- Artificial Intelligence with Python – Great Learning
- Data Analyst in Python, Tableau, SQL & ChatGPT – Udemy
- Google Cloud Skills Boost – Introduction to Data Engineering
